

connecting the rinse medium filter outlet connection device to the reservoir of the rinse medium; and

driving the pump to circulate the rinse medium from the rinse medium reservoir through the oxygen line, through the rinse medium filter and back to the reservoir.

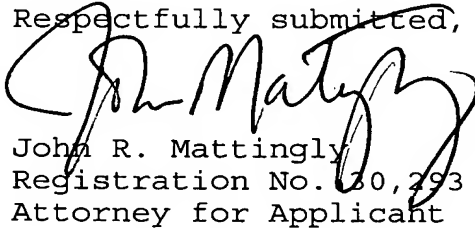

B1
Contd.

38. (New) A method of cleaning an oxygen line according to claim 36, further including the step of connecting said pump to an air inlet connection device within said unit, said pump being an air powered pump, and in said step of driving said pump, supplying air through said air inlet connection device to drive said pump.

REMARKS

Examination is respectfully requested.

Respectfully submitted,
